

FINK QUALITÄTSGARANTIE

Product information nickel plated items

Every single item is checked after each stage. Small unevennesses regarding the form, surface or other details happen during the manual production and make every single item unique.

We would like to point out that nickel products are not suitable for outdoor.

CARE INSTRUCTIONS FOR NICKEL PLATED ITEMS

We recommend our special Fink care range. The premium cleaning cloth CARE is best suitable specifically for cleaning metal surfaces like stainless steel, nickel plated or tarnish protected silverware. CARE is extremely durable and hard-wearing for thoroughly cleaning glass, crystal, porcelain, marble, stainless steel, flagstones, acryl, ceramics, wood, monitors, plastics, chrome, aluminium, brass, lacquer and much more. Fingerprints on matt surfaces will be removed easily.

Before using CARE please rinse the cloth thoroughly using clear water and wring it out well. Apply the cloth fog-damp and dry. If the cloth is soiled heavily, wash it in the machine (60°C) using customary agents.

Please do not put it into the dryer.
